Right to work in Ireland: insert Stamp 1G expiry date before sending

Personal profile

Full-stack software engineer with two years and seven months of production experience at Resideo Smart Home Technology, Bangalore, building Angular applications, ASP.NET Core APIs and Azure services through to release. Completed an MSc in Software Design with Artificial Intelligence at Technological University of the Shannon on 27 October 2026, and a full-stack internship with Mersus Technologies in summer 2026. Seeking a permanent software engineering role in Ireland. Available to start immediately. Not seeking a further internship. Open to hybrid work in Dublin.

Key skills

Languages: C#, TypeScript, JavaScript, Python, SQL, Java.

Front end: Angular 13 to 16, shared components, TypeScript.

Back end: ASP.NET Core 6, REST APIs, Node.js, SQLite.

Delivery: Azure, Git, Docker, continuous integration and delivery (CI/CD), Jira, Agile.

Employment history

Product Design Engineer (full-stack software) February 2023 - September 2025

Resideo Smart Home Technology, Bangalore, India

The official title was Product Design Engineer. The duties were full-stack software engineering on a smart-home product.

- Owned Angular feature modules connected to ASP.NET Core 6 APIs, including shared components used by the wider product team.
- Migrated the application from Angular 13 to 16 and refactored more than 25 components, reducing the bundle size by 15%.
- Improved Azure APIs using batching and caching. Response time on the paths owned came down to 50ms.
- Released those modules with user experience and quality assurance colleagues. Feature release time on that work dropped by 30%.

Full-Stack Developer, internship June 2026 - August 2026

Mersus Technologies, Ireland

- Built an internal code-documentation tool in Angular and Node.js on the team's source-control workflow. Manual documentation effort on that path fell by 90%.
- Added a SQLite-backed editor so writers could update content without a new deployment, with a clear split between data and the user interface.

Education

MSc Software Design with Artificial Intelligence September 2025 - October 2026

Technological University of the Shannon

- Awarded 27 October 2026. NFQ Level 9. No examinations or thesis outstanding.
- Coursework in software design, machine learning and applied artificial intelligence.

B.E. Information Science and Engineering January 2019 - December 2023

Mangalore Institute of Technology and Engineering, India

- Bachelor of Engineering awarded in India. Final year overlapped with the start of employment at Resideo.

Technical projects

DocDrift October 2026

Nebius and NVIDIA hackathon

- Python tool that runs code samples from a README in a sandbox, asks an NVIDIA Nemotron model for a fix, and keeps the fix only if the sandboxed re-run passes.
- 65 automated tests. Public demonstration: adarsh6980.github.io/docdrift.

LocalDeploy Personal project

C#, ASP.NET Core, YARP

- Command-line tool that turns a local Angular and ASP.NET Core application into one temporary single-origin demonstration link.
- Repository: github.com/adarsh6980/LocalDeploy.

Form Friend Hackathon project

JavaScript

- Turns official Irish forms into guided plain-language steps.
- Repository: github.com/adarsh6980/form-friend.
